Organic Farming Research Foundation

OFRF's Organic Research Hub is a curated collection of scientific and technical resources to help organic farmers understand and solve their production challenges.

Within the Hub, you will find research summaries, fact sheets, guidebooks, webinars, videos, tools, and other resources collected and compiled from the nation's top organic farming organizations, research scientists, and supporting institutions. The Hub also houses an extensive database of OFRF resources, including OFRF-funded research summaries.

Organic Agriculture's National Resource for Farmers and Ranchers brought to you by eOrganic

This website, created by the eOrganic Community of Practice of the Extension Foundation (formerly eXtension), is for farmers, ranchers, agricultural professionals, certifiers, researchers and educators seeking reliable information on organic agriculture, organic farming research results, farmer experiences, and certification. Our current content is focused on general organic agriculture, dairy production, and vegetable production. The content is collaboratively authored and reviewed by our community of University researchers and Extension personnel, agricultural professionals, farmers, and certifiers with experience and expertise in organic agriculture.

Welcome to Organic Eprints

Organic Eprints is an international open access archive for papers and projects related to research in organic food and farming. The archive contains full-text papers in electronic form together with bibliographic information, abstracts and other metadata. It also offers information on organisations, projects and facilities in the context of organic farming research. [More about the archive.](#)

2. Zoom sur quelques institutions clef

Le FiBL (<https://www.fibl.org/fr>)

L'institut de recherche de l'agriculture biologique

The screenshot shows the FiBL website homepage. At the top right is a search icon and a "DONS" button. Below the header are navigation links: SITES, SUJETS/PROJETS, SERVICES, INFOthèque, and À PROPOS DE NOUS. A large image of agricultural fields is the main visual element. A sidebar on the left contains a section titled "Essai DOK" with the text "40 ans d'agriculture biologique: avantageuse pour les sols et efficace". Below this are icons for social media and a "DE EN FR IT" language switcher. At the bottom, there's a "SITES" section with icons for Suisse, Allemagne, Autriche, Hongrie, France, and Europe.

Lignes directrices

Implantés dans divers pays européens, les instituts de recherche de l'agriculture biologique (FiBL) sont des organisations de la société civile ou des entreprises reconnues d'utilité publique, indépendantes des pouvoirs publics et ayant un statut de fondation ou d'association. Bien qu'autonomes au plan juridique, ils se considèrent comme partie intégrante du Groupe FiBL, qui fonctionne sur le mode du partenariat étroit.

Le Groupe FiBL a pour objectif de développer en permanence l'agriculture biologique tout au long de la filière du système alimentaire par la recherche, le transfert du savoir et la vulgarisation, ainsi que par des projets axés sur la pratique et des initiatives de relations publiques. En collaboration avec des partenaires professionnels, d'autres instituts de recherche et de vulgarisation, des établissements publics et des organisations non gouvernementales en Europe et sur d'autres continents, nous menons des projets visant à garantir la sécurité alimentaire et la conservation des ressources naturelles par le biais de l'agriculture biologique et d'un système alimentaire durable. Les six FiBL misent sur la responsabilité envers l'être humain, l'animal et l'environnement, ainsi que sur la transparence et la participation en interne comme en externe. Le respect envers les collaborateurs, les partenaires de coopération et l'individu en général, ainsi que la prise de décision démocratique sont considérés comme des prérequis fondamentaux pour la réussite et la reconnaissance de l'action du FiBL dans le monde.

Le Groupe FiBL réunit à l'heure actuelle le FiBL Suisse (fondé en 1973), le FiBL Allemagne (2001), le FiBL Autriche (2004), ÖMKi (institut de recherche hongrois sur l'agriculture biologique, 2011), le FiBL France (2017) et le FiBL Europe (2017), qui représente les cinq instituts nationaux.

CORE Organic Pleiades: International collaboration for organic research

CORE Organic Pleiades is a European network of ministries and research councils that funds research in organic food systems. Furthermore, the network serves as a platform for policy exchange and focuses on increasing R&I funding to support the targets for organic food, farming and aquaculture as set out in the European Green Deal. Explore the sections below for more information about CORE Organic activities.

ORGANIC ECOSYSTEM

BOOSTING CROSS BORDER ORGANIC ECOSYSTEM
THROUGH ENHANCING AGRO-FOOD ALLIANCES

The regional initiative aimed to establish a cross-border agri-food ecosystem which set the ground for the development of the whole Mediterranean organic sector. This was encouraged through new business alliances, creation of innovative value chains, and specialized support provided to MSMEs to increase the quality and the commercialization of products and their capacities to access new markets in collaboration with Competent Public Authorities.

Conclusions

- Valeurs ajoutées d'une coopération transnationale, via les (appels à) projets et autres activités: état de l'art (connaissances, impacts..), moindres redondances, identification de réseaux, taille critique sur certains thèmes, apprentissages,...
- L'environnement social et international comme réservoir potentiel d'enjeux et de thématiques: signaux faibles, interfaces science/politique/parties prenantes
- L'avenir de l'AB se joue également dans le cadre de l'agroécologie (coalitions d'intérêt, après des trajectoires parallèles)

Merci pour votre
attention !

Team-up and unlock the transition to agroecology so that farming systems are resilient, productive and prosperous, place-sensitive, as well as climate, environment, ecosystem, biodiversity and people-friendly by 2050

AGROECOLOGY in a nutshell

Jan 2024 to Dec 2033

Horizon Europe co-funded partnership in Cluster 6
Phase 2 for AGROECOLOGY is approaching (see [WP2025](#))

Pool resources of EU and states/regions

Mobilisation of 300 Mio € (50% co-funded)

In-kind: research and networking activities

In-cash: up to 7 transnational calls for proposals

72 partners from 26 states/regions

RFOs: National/Regional Authorities, ministries, Funding agencies

RPOs: Research performing organisations
